

Special Import Small Volume Parenteral Code List

To address shortages of critical drug products from the aftermath of Hurricane Maria, Baxter Healthcare Corporation (Baxter) is coordinating with the U.S. Food and Drug Administration (FDA) to increase the availability of products from Baxter's manufacturing facilities around the world.

Baxter Healthcare has successfully registered and initiated temporary importation of Sodium Chloride 0.9% and Dextrose 5% Intravenous Infusion standard Minibags in VIAFLEX and VIAFLO plastic containers.

FDA has not approved the listed products manufactured by Baxter's manufacturing facility in Ireland, Australia and Mexico.
